THE STUFF YOU REALLY NEED OUT THERE

John E. Phillips and A.C. Ray

Neat New Archery Gear

New products can make hunting more fun, safe and efficient, but it's the edge new gear can offer that bowhunters are really looking for when they go shopping. Check out the following items for making your season even more successful.

Alpen Outdoor Rainier 68 Binoculars

The Features: The optics are coated with the exclusive UBX multi-layer coating, which provides maximum light transmission. The binocular comes equipped with extra large BaK-4 prisms layered with SHR metallic coating and PXA phase coating, which deliver brightness, clarity and color fidelity. The O-ring-sealed nitrogen-filled body ensures complete waterproof and fogproof protection. The whole unit weighs only 25 ounces.

Why We Like It: The large-diameter lens elements throughout the optical system provide enhanced field-of-view and eye relief, while the twist-lock eyecup system ensures easy, comfortable viewing. The rugged magnesium body will survive the roughest conditions and comes with a lifetime warranty.

Cost & Contacts: \$1,070; 877-987-8370; alpenoutdoor.com
